Saving Attorneys Time and Money

Pre-trial/pre-litigation medical consulting to attorneys.

Clarify your strategy by identifying significant medical or surgical issues early on.

Avoid pursuing a weak case.

Affordable consultations.

Just a few hours of our time can save many hours of yours.

Physician Consulting for Your Medical-Legal Cases

We recommend that all medical cases be carefully reviewed by a physician.

Avoid wading through those medical reports by yourself, trying to determine what is relevant and what is not.

Our experienced physicians can help with issues related to any medical or surgical questions.

We have experience with trauma, injuries, surgical complications, cancer, medical illness, and causation.

We will review medical records for importance and relevance, and provide supportive medical research.

We can help with alternative views of the meaning of the medical facts.

We can help you prepare to interview opposing counsel's expert witness.

Comprehensive, Concise Analysis

You choose the format: a phone discussion, a brief summary, or an in-depth analysis with references.

We will expedite all reviews so you can get your case moving forward.
